

Paint & Stain Remover

ACR® Paint & Stain Remover is designed to remove paint and paint related stains from the surface of concrete and masonry. Paint and the related staining will cause TechCrete Waterproofing Agent to lose its effectiveness and not penetrate the surface properly.

ACR Paint & Stain Remover is specifically created to effectively remove all types of water-based paints, oil-based paints, and permanent markers from almost any surface. ACR Paint & Stain Remover can remove multiple layers, and in most cases, with one application. ACR Paint & Stain Remover is ready to use as packaged and does not require any mixing.

NOTE: Test ACR Paint & Stain Remover on all plastic surfaces prior to use.

ACR Paint & Stain Remover is a biodegradable product, however the resulting sludge or waste should be disposed of according to local regulations.

PACKAGING

ACR Paint & Stain Remover comes in these sizes:

- 1 gallon bottles (3.8 liters)
- 5 gallon pails (18.92 liters)
- 55 gallon drums (208.2 liters)

FEATURES

- Non-abrasive
- Bio-based
- High flash point
- Exceptional performance on most surfaces
- User friendly
- No toxic fumes
- Mild soap & water rinse

SHELF LIFE & STORAGE

Containers should be sealed and kept in a cool dry location. Avoid prolonged exposure to direct sunlight. If properly maintained this product has a shelf life of one (1) year.

DIRECTIONS

1. For best results, use at temperatures between 50° F. and 90° F. Do not allow to freeze as product will lose some of its effectiveness.
2. Shake or agitate contents for at least one (1) min prior to application, and occasionally during use.
3. Use a sprayer to evenly apply a liberal coat of ACR Paint & Stain Remover to the targeted area.
4. Allow remover to work. The longer it sets, the less work for you. Typically from 15 minutes to 3 hours, longer for heavy or old paint or paint stains. Product has a 12 hour wet time.

WARNING: Longer soak times may cause the remover to penetrate deeper than intended.

5. Use brush, putty knife, rag, scouring pad, or scrubber for removal.
6. Flush surface with soap and water to neutralize the effects of the product. If product is not neutralized, it will continue to work and may damage the surface.
7. Before disposal, wash rags in soap & water and dry in a well-ventilated area. Paint residue-soaked rags can cause spontaneous combustion if not handled properly.

NOTE: TechCrete warranties require the use of this product or one of the many ACR products. Chemical cleaning may require multiple applications and the use of different products to achieve a clean surface. Certain types of cleaning equipment may improve performance and speed of application. When applying chemical cleaners, contact the Technical Department for a list of approved equipment and cleaning methods.

Other ACR products that may be utilized for surface preparation on warranted applications;

- ACR Concrete & Masonry Cleaner
- ACR Concrete & Masonry Etch
- ACR Emulsifying Cleaner
- ACR Rust Converter & Inhibitor

Contact the Technical Department for help and directions for which cleaning product will provide the best option for a clean surface.

BIO BASED

ACR Paint & Stain Remover has been tested and contains no less than 50% bio-based materials. ACR Graffiti Remover does not contain any petroleum distillates or petroleum by-products.
